Maximum Marks	2 Marks

Customer Journey Map

Map out the learner's experience stage-by-stage while using EduGenie, capturing their actions, touchpoints, thoughts, and feelings, along with process ownership and improvement opportunities at each stage.

Phase of Journey	Stage 1 Ask a Question	Stage 2 Generate a Quiz	Stage 3 Get a Learning Path
Actions <i>What does the learner do?</i>	• Opens the EduGenie web app • Types a subject question (e.g. "Which is the largest ocean?") • Submits the query for an answer	• Selects the topic to be tested (e.g. Pythagoras Theorem) • Clicks "Generate Quiz" • Answers the AI-generated questions	• Requests a learning roadmap (e.g. for SQL) • Reviews beginner, intermediate, advanced topics • Follows suggested study recommendations
Touchpoint <i>What part of the service do they interact with?</i>	• HTML/CSS chat interface • Question input box • Answer display panel	• Quiz Generation module • Topic selection field • Interactive quiz interface	• Learning Path Recommendation module • Roadmap display panel • Progress tracking view
Learner Thought <i>What is the learner thinking?</i>	• "Will I get an accurate, clear answer?" • "Will it explain the concept, not just give a fact?" • "Is this faster than searching myself?"	• "Will the questions match what I've studied?" • "Will I get instant feedback?" • "Is the difficulty level right for me?"	• "Does this cover everything I need to learn?" • "Is the progression logical and achievable?" • "Can I track my progress over time?"
Learner Feeling <i>What is the learner feeling?</i>	• Curious, Hopeful	• Engaged, Slightly Anxious	• Motivated, Confident
Process Ownership <i>Who is in the lead on this?</i>	• Learner / FastAPI Backend / Gemini AI	• Learner / Quiz Generation Engine / Gemini AI	• Learner / Recommendation Engine / Database
Opportunities <i>How can we improve this stage?</i>	• Add follow-up question support • Highlight key terms in answers • Add voice input for questions	• Add adaptive difficulty based on performance • Provide instant score and explanations • Allow quiz export/download	• Store learning history in a database • Add progress tracking dashboard • Deploy application to the cloud for continued access
